these *prepackaged* items, the pharmacist performs largely a packaging rather than a compounding function of former times. Our decision today, therefore, deals largely with the State's power to prohibit pharmacists from advertising the retail price of *prepackaged drugs.* As the Court notes, *ante,* at 773 n. 25, quite different factors would govern were we faced with a law regulating or even prohibiting advertising by the traditional learned professions of medicine or law. "The interest of the States in regulating lawyers is especially great since lawyers are essential to the primary governmental function of administering justice, and have historically been 'officers of the courts.'" *Goldfarb* v. *Virginia State Bar,* 421 U. S. 773, 792 (1975). See also *Cohen* v. *Hurley,* 366 U. S. 117, 123–124 (1961). We have also recognized the State's substantial interest in regulating physicians. See, *e. g., United States* v. *Oregon Medical Society,* 343 U. S. 326, 336 (1952); *Semler* v. *Oregon State Board of Dental Examiners,* 294 U. S. 608, 612 (1935). Attorneys and physicians are engaged *primarily* in providing services in which professional judgment is a large component, a matter very different from the retail *sale* of labeled drugs already prepared by others.

MR. JUSTICE STEWART aptly observes that the "differences between commercial price and product advertising . . . and ideological communication" allow the State a scope in regulating the former that would be unacceptable under the First Amendment with respect to the latter. I think it important to note also that the advertisement of professional services carries with it quite different risks from the advertisement of standard products. The Court took note of this in *Semler, supra,* at 612, in upholding a state statute prohibiting entirely certain types of advertisement by dentists:

"The legislature was not dealing with traders in
