from neutral sources . . . ." *Ante,* at 321. Thus, the only question for the magistrate's consideration is whether the contemplated inspection deviates from an inspection schedule drawn up by higher level agency officials.

Unlike the traditional warrant, the inspection warrant provides no protection against the search itself for employers who the Government has no reason to suspect are violating OSHA regulations. The Court plainly accepts the proposition that random health and safety inspections are reasonable. It does not question Congress' determination that the public interest in workplaces free from health and safety hazards outweighs the employer's desire to conduct his business only in the presence of permittees, except in those rare instances when the Government has probable cause to suspect that the premises harbor a violation of the law.

What purposes, then, are served by the administrative warrant procedure? The inspection warrant purports to serve three functions: to inform the employer that the inspection is authorized by the statute, to advise him of the lawful limits of the inspection, and to assure him that the person demanding entry is an authorized inspector. *Camara* v. *Municipal Court,* 387 U. S. 523, 532. An examination of these functions in the OSHA context reveals that the inspection warrant adds little to the protections already afforded by the statute and pertinent regulations, and the slight additional benefit it might provide is insufficient to identify a constitutional violation or to justify overriding Congress' judgment that the power to conduct warrantless inspections is essential.

The inspection warrant is supposed to assure the employer that the inspection is in fact routine, and that the inspector has not improperly departed from the program of representative inspections established by responsible officials. But to the extent that harassment inspections would be reduced by the necessity of obtaining a warrant, the Secretary's present enforcement scheme would have precisely the same effect.
